

VISHNU MOHANAN

Senior Product Manager – AI Products, Growth & Platform

Dublin, Ireland | mohanany@gmail.com | LinkedIn: <https://www.linkedin.com/in/mohanany/> | Portfolio: vishnu.fyi

SUMMARY

Senior product manager with 9+ years at HubSpot, shipping AI products to a platform of 300K+ customers. I own personalisation, connectors and Slack for Breeze Assistant, and previously led HubSpot's #1 2025 priority, AI-led onboarding. I set direction across teams, prove impact with evals and experiments, and prototype in code myself.

CORE SKILLS

AI product strategy • LLM evals & prompt design • Agents, MCP & integrations • Personalisation • PLG & onboarding • Mobile platform • Product analytics (SQL)

EXPERIENCE

HubSpot - Dublin, Ireland

Senior Product Manager, Breeze Assistant - Personalisation, Connectors and Surfaces | 2025–Present

- Wrote the strategy and charter uniting three engineering sub-teams (Projects, Connectors, Slack) under one north-star metric.
- Owned Breeze Projects, the personalisation layer for Breeze Assistant. Found 86% of new projects had no context and rebuilt creation around templates built from usage data: weekly project chats doubled in two weeks, and project users return 1.6x as often as average.
- Reframed Breeze Assistant in Slack as a conversion problem (75x more people saw its cards than @mentioned it); weekly @mention users grew 6x+ in a month.
- Led customer discovery (10+ interviews in 3 weeks) to set connector priorities, then aligned three teams on rebuilding connectors on MCP.
- Took over AI Search after the founder PM left; rebuilt focus, execution rhythm and roadmap clarity.

Senior Product Manager, Growth & Onboarding | 2024–2025

- Led HubSpot's #1 2025 priority, product-led onboarding for Professional customers. Launched an AI agent that turns a customer's goals into a personalised plan; built its golden eval set from 100 specialist calls and wrote its system prompt. Plan conversion doubled from 33% to 66%.
- Shifted onboarding from "setup complete" to "value realised": +20 points in Week-1 visits and +26 points in Month-1 usage versus control.
- Lifted Professional activation 23% across Sales Hub and moved \$270K of MRR onto the product-led path instead of paid human onboarding; the framework scaled to four more Hubs.
- Interim SPM for two Growth teams (~6 months) during leadership turnover, running three roadmaps; mentored two PMs, one promoted to Senior PM.

Senior Product Manager, Mobile Reporting & Platform | 2021–2024

- Built mobile dashboard reporting: 55K WAUs (about 1 in 5 mobile WAUs), retention up from 27% to 43%, cross-platform usage up from 3% to 10%.
- Led the React Native migration: Quotes shipped on iOS and Android in ~2 months vs. a ~6-month estimate.

Product Manager / Associate Product Manager, Mobile | 2019–2021 (APM to PM in 13 months)

- Shipped HubSpot's first mobile AI feature, a computer-vision business card scanner that increased contact creation 4.5x.
- Shipped Today View, the daily home for sales reps: 29% daily engagement, ~2 points Android retention lift, HubSpot's #1 mobile sales feature for two years.

Founding Support Engineer / Product Expert (EMEA) | 2015–2019

- One of the first 10 Dublin support hires; co-designed hiring as the site grew to 50+, and created BIRA, the seed of HubSpot's company-wide Voice of the Customer program.

BUILDING

- laceup.club, tennis club SaaS I built and run: 148 clubs, 40,000 match records in production (Next.js, Supabase, Claude Code).
- Prototype AI features in code before engineering starts, and run my own agentic workflows (Claude Code + MCP) across Slack, calendar and data warehouse.

EDUCATION

Trinity College Dublin: PhD, Botany (2015, HEA Scholarship); BA (Hons), Natural Sciences (2011, SFI Scholarship).
